

What Will Be Required to Maintain My CPH Status?

CPH professionals are required to obtain and document 50 hours of continuing education every two years. Additionally, CPH professionals will be required to complete a re-assessment experience in 10 years.

Join the ranks of public health professionals who have become Certified in Public Health.

"Our health department will look for CPH status in our recruitment process since it provides a standardized way of assuring a basic understanding of public health concepts."

Terry Dwelle, MD | Chair, NBPHE
State Health Officer
North Dakota Department of Health

"I took the CPH exam to test my public health knowledge and skills and gain an additional qualification. Also because it provides the opportunity to compare one's training and capability to a larger, national group of practitioners. I would encourage everyone eligible to take this standardized test and help establish and elevate the standards of public health practice."

Member of the Charter Class of CPH

About the NBPHE

The National Board of Public Health Examiners (NBPHE) was incorporated in 2005 to develop, prepare, administer and evaluate certification examinations for graduates from Council on Education for Public Health (CEPH)-accredited schools and programs of public health. NBPHE and its participating organizations have the goal of strengthening the practice of public health, including facilitating recognition of the important role of public health workers in protecting the nation's health and safety.

Participating Organizations Include:

- American Public Health Association (APHA)
- Association for Prevention Teaching and Research (APTR)
- Association of Schools of Public Health (ASPH)
- Association of State and Territorial Health Officials (ASTHO)
- National Association of County and City Health Officials (NACCHO)

Get **Take the Exam!**
Certified in Public Health (CPH)!

www.publichealthexam.org

Exam Dates:
February 4-26, 2011

Why Should I Get Certified?

Public Health professionals assure healthy communities. **Becoming Certified in Public Health helps the public health profession by setting standards consistent with the expectations of the public.** Becoming a Certified in Public Health professional is an investment in your career, livelihood, and future. It also:

- Sets a standard of excellence in the field of public health.
- Improves the quality of public health service for communities and the nation.
- Fosters an environment of life-long learning.
- Encourages the recognition of a professional community.
- Opens doors for participation in workshops, conferences and other professional activities.

Can I Get Certified?

To be eligible for the CPH exam, you must have completed all degree requirements from a CEPH-accredited school or program of public health by December 31, 2010. Students enrolled at CEPH-accredited schools or programs participating in the CPH early exam administration are eligible with 21 credit hours completed towards their public health degree by December 31, 2010.

How Do I Get Certified?

Register online at www.publichealthexam.org. When you are notified by NBPHE that you have passed the exam, you will be Certified in Public Health and can add the credential CPH to your name and degree!

When Do I Get Certified?

The exam dates are **February 4-26, 2011**. Good seats go fast (Pick your exam location later – after you register).
